

Ultimate Phonics Word Lists and Sentences

This pdf ebook contains all the word lists and sentences taught by the [Ultimate Phonics Reading Program software](#). These are some of the best word lists and practice sentences you will find anywhere, and can be used to improve any reading program.

✔ 262 phonics-based lessons

The word lists are organized into 262 phonics-based lessons. All the word lists are 100% decodable, meaning they only use phonics rules from the current lesson and earlier lessons. This organization enables your children or students to learn all the phonics patterns and sounds of English in addition to the specific words.

In addition to the word lists, each lesson has around 8 to 10 practice sentences. These sentences are also 100% decodable, meaning they only use words taught in the current lesson or earlier lessons.

✔ Over 4,400 words and 2,100 sentences

In these 262 lessons the student learns to read over 4,400 of the most common words in English, which constitute the core of the language. In addition, the student learns to read over 2,100 decodable sentences written with this core vocabulary.

Anyone who learns to fluently and accurately read this material is very likely to become a good reader. Further, our experience has shown that this level of reading is achievable for most people, including children as young as four or five years and older students who previously struggled with reading.

✔ Use with Ultimate Phonics software for great results

All these lessons are taught in our [Ultimate Phonics software](#). Every word and sentence is broken down and interactively sounded out on your computer. This makes it a very powerful learning tool which greatly improves the results of other reading programs.

✔ Scope and sequence included

We have included the Ultimate Phonics scope and sequence at the front of this document to be used as a table of contents for the lessons.
