DUI/Driver's License Checkpoint Planned this Saturday

National City, CA –The National City Police Department Traffic Unit will be conducting a DUI/Driver's License Checkpoint on July 27th, 2019 at an undisclosed location beginning at 6 PM.

In recent years, California has seen a disturbing increase in drug-impaired driving crashes. The National City Police Department supports the new effort from the Office of Traffic Safety that aims to educate all drivers that "DUI Doesn't Just Mean Booze." If you take prescription drugs, particularly those with a driving or operating machinery warning on the label, you might be impaired enough to get a DUI. Marijuana can also be impairing, especially in combination with alcohol or other drugs, and can result in a DUI.

The deterrent effect of High Visibility Enforcement using both DUI checkpoints and DUI Saturation Patrols has proven to lower the number of persons killed and injured in alcohol or drug impaired crashes. Research shows that crashes involving an impaired driver can be reduced by up to 20 percent when well-publicized proactive DUI operations are conducted routinely.

DUI Checkpoints like this one are placed in locations based on collision statistics and frequency of DUI arrests, affording the greatest opportunity for achieving drunk and drugged driving deterrence. Locations are chosen with safety considerations for the officers and the public.

In California, alcohol involved collisions led to 1,155 deaths and nearly 24,000 serious injuries in 2014 because someone failed to designate a sober driver.

Officers will be looking for signs of alcohol and/or drug impairment, with officers checking drivers for proper licensing, delaying motorists only momentarily. When possible, specially trained officers will be available to evaluate those suspected of drug-impaired driving, which now accounts for a growing number of impaired driving crashes.

Studies of California drivers have shown that 30 percent of drivers in fatal crashes had one or more drugs in their systems. A study of active drivers showed more tested positive for drugs that may impair driving (14 percent) than did for alcohol (7.3 percent). Of the drugs, marijuana was

most prevalent, at 7.4 percent, slightly more than alcohol. Everyone should be mindful that if you're taking medication – whether prescription or over-the-counter – drinking even small amounts of alcohol can greatly intensify the impairment affects.

Drivers are encouraged to download the Designated Driver VIP, or “DDVIP,” free mobile app for Android or iPhone. The DDVIP app helps find nearby bars and restaurants that feature free incentives for the designated sober driver, from free non-alcoholic drinks to free appetizers and more. The feature-packed app even has social media tie-ins and even a tab for the non-DD to call Uber, Lyft or Curb.

Drivers caught driving impaired can expect the impact of a DUI arrest to include jail time, fines, fees, DUI classes, license suspensions and other expenses that can exceed \$10,000 not to mention the embarrassment when friends and family find out.

Funding for DUI enforcement is provided by a grant from the California Office of Traffic Safety, through the National Highway Traffic Safety Administration.
