10. Sand Traps - All sand traps shall be edged as necessary to maintain a neat lip, raked daily and filled with fresh sand as needed to maintain a 4" depth on slopes and in the bottom. Replacement sand will be of a dust-free type, silica sand if possible.
11. Color Areas - Various planting areas throughout course shall be regularly cultivated, weeded and pruned on a regular basis with at least two replanting programs for annuals scheduled each year.
12. Construction and Remodeling - Any change in the physical characteristics of any area of the golf course such as addition or removal of sand traps, addition or removal of any hazards (water, trees or native vegetation), regrading involving movement of soil exceeding 20 cubic yards in any single area, or the modification of any portion of the golf course or the buildings will be undertaken after consulting with the lessor.
13. Crews - A full maintenance crew shall be on duty at the course daily under the supervision of an on duty superintendent. (A qualified golf course superintendent is defined as an individual with a degree from a two or a four year college or university accredited in agronomy)
14. Provide rodent control.
15. Trash and debris removal will be at management firm's expense. Management firm will take special care to insure minimal problems from refuse odors, insects, etc. Trash recepticals shall be conveniently stationed on tees and at clubhouse and emptied daily.
16. Other - All lakes and bridges will be maintained in a safe and sanitary manner and in good appearance. Rough mowed in all unimproved areas as needed, fairways, rough and fence lines sprayed for weed control, and soil tested with adequate analysis at least once per year.

NOTE: THESE SPECIFICATIONS ARE MEANT TO INDICATE MINIMUM PRACTICES NECESSARY FOR THE PROPER MAINTENANCE OF THE GOLF COURSE IN CONDITIONS SPECIFIED EARLIER, BUT NOTHING IN THESE SPECIFICATIONS SHALL BE INTERPRETED TO LIMIT THE RESPONSIBILITY OF THE MANAGEMENT FIRM.
